In the Claims:

Amend the claims as follows:

5

1. (Currently amended) ~~System~~ A system for file management in a mobile network, comprising:  
~~one or more~~ a mobile communication device terminals having a memory with saved file information and a central database  
10 containing information to be updated in the files of ~~said the~~  
~~one or more~~ mobile communication device phones, characterized  
~~in that~~  
the central database ~~has~~ having information about to which  
mobile ~~phones~~ communication devices the updated information  
15 ~~shall be is~~ is sent, and ~~that the system further comprises a~~  
physical access control system being connected to the  
information to be updated in the mobile communication devices  
~~phones~~ and for requesting a change in the files of the mobile  
communication device terminal (s), and  
20 means for updating the new information in the files of the  
mobile communication device terminal (s) informed in the  
central database.

2. (Currently amended) ~~System~~ The system of claim 1,  
25 ~~characterized in that~~ wherein the mobile network is a the  
Global System of Mobile Communication (GSM).

3. (Currently amended) ~~System~~ The system of claim 1,  
~~characterized in that~~ wherein the central database contains  
30 Subscriber Identity module(SIM) phonebooks of subscribers in  
~~the~~ an GSM network.

4. (Currently amended) ~~System~~ The system of claim 1,  
~~characterized in that~~ wherein the information to be updated  
35 consists of contact information ~~such as telephone numbers~~,

~~location and time information, fax numbers, e-mail addresses, calendar information and/or other information.~~

5. (Currently amended) ~~System~~ The system of claim 1,  
5 ~~characterized in that wherein~~ the memory is a Subscriber Identity Module (SIM) with a standard EFADN file containing field information.

10 6. (Currently amended) ~~System~~ The system of claim 6,  
~~characterized in that 5 wherein~~ the EFADN file in the SIM contains additional contact information, ~~such as location and time information, fax numbers, e-mail addresses and/or other information~~ besides the ~~alfa~~ alpha identifier information of telephone numbers.

15 7. (Currently amended) ~~System~~ The system of claim 6 7,  
~~characterized in that wherein~~ the additional contact information is embedded in the ~~the~~ an alpha identifier field of the EFADN file.

20 8. (Currently amended) ~~System~~ The system of ~~claim 7 or 8,~~  
~~characterized in that claim 7 wherein~~ the additional contact information is coded to a shorter form to make ~~it the~~ additional contact information suitable to be embedded.

25 9. (Currently amended) ~~System~~ The system of ~~any of claims 1-9,~~  
~~characterized in that it claim 1 wherein~~ the method further comprises a SMS gateway performing charging and other administrative tasks.

30 10. (Currently amended) Method for file management in a mobile network, comprising:  
providing one or more mobile terminals communication devices  
having a memory with saved file information and a central  
35 database containing information to be updated in the files of

RP 502.1153USN 5/29/05

- 4 -

~~said~~ one or more mobile communication devices phones, a physical access control system connected to the information to be updated in the mobile communication devices phones,  
a) sending from the physical access control system to the  
5 central database a request for a change to be made in the files of the mobile communication device terminal (s),  
b) the central database updating ~~its~~ information of the central database on the basis of ~~said~~ the request, and  
c) sending from the central database the new information to  
10 the files of the pre-determined mobile communication device terminal (s) defined in the central database.

11. (Currently amended) ~~Method of claim 10, characterized in that~~ The method of claim 10 wherein a request for a change to  
15 be made in the files of a selected mobile communication device terminal (s) ~~is~~ sent from a mobile communication device phone.
